## Experts in Concrete Scanning and Mapping

Buildings | Bridges | Terrestrial Structures

Supported by highly experienced operators and our state of the art Concrete Scanning Equipment, HCS provides a range of services across all types of concrete structures for the safety of your site.

- Identification of post-tension, reinforcing, conduits, band beams and anomalies on new and existing suspended and on ground slabs.
- Structural detailed reporting of suspended slabs and walls prior to structural engineering assessment and loading design.
- Structural investigation reporting on existing slab conditions for warranty compliance
